Welcome to GitHub!

Git

- Git is a source control management tool.

- Git allows you to store and update your code in a structured way.

- Git includes history of changes you make, so you can create "checkpoints" and track your work better over time.
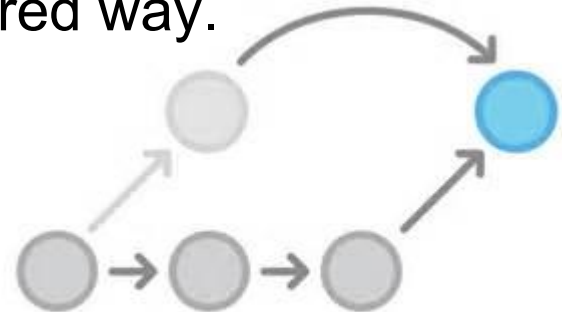

GitHub

GitHub is a service that lets you host Git repositories in the cloud.

GitHub: Benefits
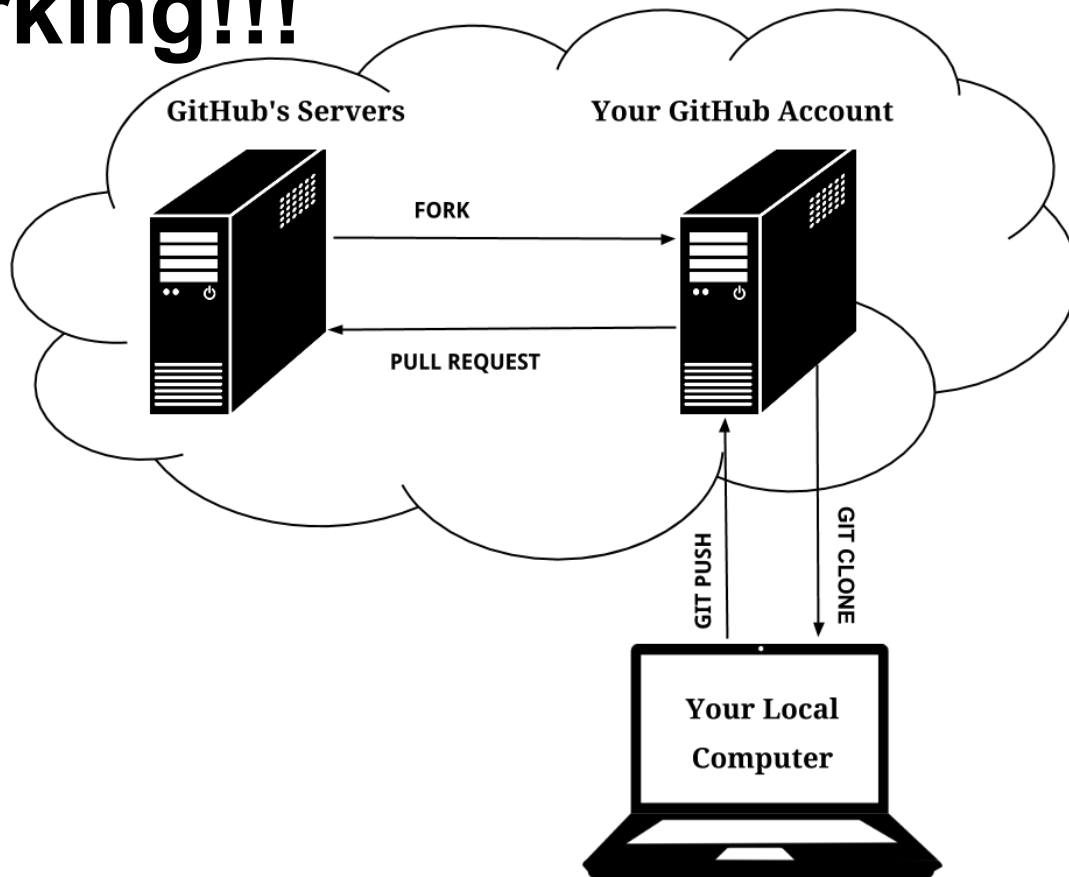

Distribute code to others by sharing your repository

View your code online easily with a web interface

Free Public Use!!!
